

MD. ROKUNUZZAMAN ROKON

Software Engineer | Python Backend Developer

rokon.raz@gmail.com | +880 173 9933 258 | Dhaka, Bangladesh | github.com/RoknuzzamanRokon | linkedin.com/in/rokon-raz

PROFESSIONAL SUMMARY

Python Backend Developer with nearly 6 years of professional experience building scalable APIs, hotel content platforms, data processing pipelines, and database-driven applications. Strong in FastAPI, Django, Flask, MySQL, PostgreSQL, SQLAlchemy, Linux, Docker, and AWS, with hands-on use of AI-assisted development tools.

PROFESSIONAL EXPERIENCE

- Innovate Solution** — Python Developer Oct 2024 – Present
 - Collect and process supplier XML/JSON static data for hotel content platforms.
 - Develop FastAPI-based APIs for data collection and business operations.
 - Integrate third-party hotel APIs and build business APIs on top of them.
 - Extract, process, and analyze data from web APIs.
 - Maintain database integrity, consistency, and performance.
- Artixcore Inc** — Python Developer Oct 2023 – Sep 2024
 - Designed and developed Python-based software applications.
 - Wrote and maintained clean, efficient, and reusable Python code.
 - Deployed applications using AWS Lambda, DynamoDB, API Gateway, and EC2.
- GorillaMove** — Junior Software Engineer Nov 2022 – Sep 2023
 - Developed and maintained frontend components and features using React.
 - Optimized web applications for performance and scalability.

CORE SKILLS

Languages	Python, JavaScript, PHP, C
Backend	FastAPI, Django, Flask, REST APIs, JWT Authentication
Frontend	React.js, Next.js
Database & ORM	MySQL, PostgreSQL, SQLite, DynamoDB, SQLAlchemy
Cloud & DevOps	AWS (EC2, Lambda, API Gateway), Docker, Linux, Redis, Git, GitHub, CI/CD
Data & Formats	XML, JSON
AI-Assisted Dev	Claude, Cursor, Codex, Ollama, Mistral

SELECTED PROJECTS

- Hotel Content API** — Content provider API platform FastAPI · MySQL · SQLAlchemy · JWT · Redis · Docker
 - Built REST APIs serving normalized hotel content (properties, rooms, images, amenities) to B2B clients.
 - Implemented JWT authentication, access control, and optimized MySQL queries for large datasets.
- Property Management System (PMS)** — Hotel booking system API FastAPI · PostgreSQL · SQLAlchemy
 - Developed booking, availability, and reservation APIs for hotel operations.
 - Designed the relational schema and business logic to keep inventory and booking data consistent.
- InnHoSel** — Hotel Content Management System Python · FastAPI · MySQL · React.js · Linux
 - Built a CMS to manage supplier hotel data, mappings, and content updates in one place.
 - Automated supplier XML/JSON ingestion and processing to reduce manual data entry.
- ConvaterPro** — Document management system Python · Django · PostgreSQL
 - Developed a system to upload, convert, organize, and retrieve documents through a clean API.
 - Implemented file handling, validation, and structured storage for reliable workflows.
- Passport Scanner** — Passport data extraction API Python · FastAPI · OCR · JSON
 - Built an API that extracts key passport fields (name, number, dates) from uploaded images.
 - Returned clean structured JSON ready for booking and check-in flows.
- Rentor** — House management system Next.js · React.js · Django · PostgreSQL
 - Created a platform to manage properties, tenants, rent records, and payment tracking.
 - Built full-stack features with authentication and a database-driven dashboard.

EDUCATION

- B.Sc. in Computer Science and Engineering (CSE)** — European University of Bangladesh CGPA: 3.26/4.00
- HSC (Science)** — Birampur Government College GPA: 3.33/5.00
- SSC (Science)** — Adarsha High School, Dinajpur GPA: 4.06/5.00
